

GABRIEL PEGUERO

📍 New York City, NY, USA ✉ Gabpeguero4@gmail.com 🌐 in/gabriel-peguero-60925741a 🌐 gabrielpeguero.netlify.app

SUMMARY

Front-End Developer with hands-on project experience building responsive, accessible web applications using JavaScript (ES6+), React, HTML5, CSS3, and TypeScript, with recent full-stack work in Node.js and Express. Skilled in component-based architecture, RESTful API integration, backend proxy servers, bcrypt authentication, rate limiting, and Content Security Policy hardening. Holds a Meta Front-End Developer Professional Certificate, a Bachelor's degree in History, and an Associate's degree in Korean from the Defense Language Institute. Actively seeking entry-level to junior Front-End Developer / Front-End Engineer roles in New York City or remote.

PROJECT

Personal Portfolio Site

github.com/Gabecera/Personal-Bio-Site

- This portfolio site, built from scratch with vanilla JS, HTML, and CSS.
- Features scroll-spy navigation, a cursor glow effect, and a fully responsive layout.

Netflix Clone

github.com/Gabecera/Netflix-Clone • February 2026 - Present

- Built a fully functional streaming UI from scratch using vanilla JavaScript (ES6+), HTML5, and CSS3 (no frameworks).
- Integrated TMDB and OMDb REST APIs with the Fetch API and async/await; built carousel rows, hover-preview cards with trailers, a My List feature via localStorage, search, and dynamic hero rotation.
- Resolved cross-browser layout issues including z-index stacking and overflow clipping to ensure hover cards rendered correctly outside scrollable rows.
- Engineered a Node.js/Express backend proxy server to protect the TMDB API key server-side, with server-side input validation, endpoint allowlisting, and a 5-minute response cache to reduce redundant API calls.
- Implemented bcrypt password hashing, express-session authentication with guest access, and brute-force protection via express-rate-limit (10 login attempts per 15 minutes).
- Hardened the client with Content Security Policy headers, iframe sandboxing, and localStorage validation; deployed to Railway with auto-deploy from GitHub.

EDUCATION

Front-End Developer Professional Certificate

Meta, via Coursera • Remote • 2026

- Completed an industry-recognized professional certificate covering JavaScript (ES6+), React.js, component-based architecture, and RESTful APIs.
- Built proficiency in Jest unit testing, Git/GitHub version control, UI/UX design principles, and responsive web design.

Bachelor of Arts, History

Southern New Hampshire University • 2026 • 3.4

- Developed strong analytical thinking, structured research, and written communication skills, directly applicable to reviewing documentation, and writing maintainable code.

Associate of Arts, Korean Language

Defense Language Institute Foreign Language Center • Monterey, California • 2018

- Completed one of the world's most intensive language immersion programs, achieving professional proficiency (DLPT 2/2/1+).

SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript

Frameworks & Libraries: React, Node.js, Express, SCSS/Sass, Jest

Tools & Practices: Git, GitHub, REST APIs, Responsive Web Design, Web Accessibility (WCAG), Cross-Browser Compatibility, Performance Optimization, DOM Manipulation, UI/UX Design Principles, Chrome DevTools, Agile/Scrum, npm
